* Since there are other applicable auto switches than listed, refer to page 759 for details.
* For details about auto switches with pre-wired connector, refer to pages 1014 and 1015.

* Solid state auto switches marked with "○" are produced upon receipt of order.
* D-A9□/M9□/A7□/A8□/F7□/J7□ auto switches are shipped together (not assembled). (For D-A9□/M9□, only auto switch mounting brackets are assembled before shipped.)
* D-C7□/C80□/H7□ auto switches are assembled at the time of shipment.
* Order auto switch mounting brackets separately when D-A9□(V)/M9□(V)/M9□(W(V))/M9□(A(V)) are mounted on ø10 and ø16 of the rail mounting type. Refer to page 759 for details.
* 1 Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance. Consult with SMC regarding water resistant types with the above model numbers.
* 2 1 m type lead wire is only applicable to D-A93.

Valve Mounted Cylinder **CVJ5 Series**

Operation type can be changed to rod extended when energized or rod retracted when energized.

An auto switch cylinder with the switch installed can also be manufactured.

Changing between Rod Extended when Energized and Rod Retracted when Energized

<Step>

This procedure is for changing the rod extended when energized to the rod retracted when energized.

- Using a screwdriver, loosen the two small round head screws, and remove the plate and the solenoid valve. At this time, instead of removing the plate and the solenoid valve separately, remove them together, with the round head screws remaining inserted.

- Turn the pipe gasket at 180° and mount, showing the letter "B".

- Install the solenoid valve and the plate, and tighten the small round head screws, with a screw driver. After tightening, press the manual button on the solenoid valve, check for any air leaks, and verify the operating conditions. When the cylinder is viewed from above, the position of the gasket is as shown in the figure below.

Manual Operation

Manual operation is possible by pushing the manual button indicated with the arrow.

Specific Product Precautions

Be sure to read this before handling the products. Refer to back page 50 for Safety Instructions, pages 3 to 12 for Actuator and Auto Switch Precautions, and 3/4/5 Port Solenoid Valve Precautions in Best Pneumatics No. 1-1.

Handling Precautions

Caution

- During installation, secure the rod cover and tighten the mounting nut or the rod cover body by applying an appropriate tightening force.**

If the head cover is secured or the head cover is tightened, the cover may rotate, leading to the deviation.

- Tighten the mounting screws with an appropriate tightening torque within the range given below.**

ø6: 2.1 to 2.5 N·m, ø10: 5.9 to 6.4 N·m
ø16: 10.8 to 11.8 N·m

- To remove and install the retaining ring for the knuckle pin or the clevis pin, use an appropriate pair of pliers (tool for installing a type C retaining ring).**

In particular, use a pair of ultra-mini pliers for removing and installing the retaining rings on the ø10 cylinder.

- For the auto switch mounting rail, do not remove the pre-equipped rail.**

Since the mounting thread is drilled through inside the cylinder, it may cause air leakage.

Warning

- Confirm the specifications.**

Products in this catalog are designed to be used for compressed air systems. If not operated within the designated pressure or temperature, it may damage the products or cause malfunction. (Refer to specifications.)

- Energizing continuously for a long period of time**

When the valve is continuously energized for a long period of time, the performance may deteriorate, shorten the service life or effect peripheral equipment adversely since temperature rises when coils generate heat.

 Note 5) When "n" is an even number, an even number that is one larger than this odd number is used for the calculation.
 However, the minimum even number is 4. So, 4 is used for the calculation when "n" is 1 to 3.

Note 1) Auto switch mounting (The adjustment as shown in the figures below is required with the following stroke ranges.)

	 <p>The proper auto switch mounting position is 5.5 mm inward from the switch holder edge.</p>	 <p>The auto switch is mounted by slightly displacing it in a direction (cylinder tube circumferential exterior) so that the auto switch and lead wire do not interfere with each other.</p>
D-A93	—	45 to less than 50 stroke
D-M9□ D-M9□W	15 to less than 20 stroke	45 to less than 55 stroke

Note 2) For the CDVJ5 series, note that 65 strokes cannot be manufactured.

Note 3) The dimension stated in () shows the minimum stroke for the auto switch mounting when the auto switch does not project from the end surface of the cylinder body and hinder the lead wire bending space. (Refer to the figure below.)

These contents apply to the rail mounting with one or two auto switches.

Note 1) Set part number which includes the auto switch mounting band (BJ2-□□□) and the holder kit (BJ5-1/Switch bracket: Transparent). Since the switch bracket (made from nylon) are affected in an environment where alcohol, chloroform, methylamines, hydrochloric acid or sulfuric acid is splashed over, so it cannot be used. Please consult SMC regarding other chemicals.

Note 2) Set part number which includes the auto switch mounting band (BJ2-□□□S) and the holder kit (BJ4-1/Switch bracket: White).

Note 3) For the D-M9□A (V) type auto switch, do not install the switch bracket on the indicator light.

Note 4) Only auto switch mounting brackets are assembled when cylinders are shipped.

Note 5) When a compact auto switch is mounted on the rail mounting type, the auto switch mounting brackets on the left are required. Order them separately from cylinders.

Example order: CDJ2B10-60-A 1 unit
D-M9BWV 2 pcs.
BQ2-012 2 pcs.

Besides the models listed in How to Order, the following auto switches are applicable. Refer to pages 941 to 1067 for detailed specifications.

Auto switch type	Part no.	Electrical entry (Fetching direction)	Features
Reed	D-C73, C76	Grommet (In-let)	—
	D-C80		Without indicator light
Solid state	D-H7A1, H7A2, H7B		—
	D-H7NW, H7PW, H7BW		Diagnostic indication (2-color)

* For solid state auto switches, auto switches with a pre-wired connector are also available. Refer to pages 1014 and 1015 for details.

* Normally closed (NC = b contact) solid state auto switches (D-F9G/F9H types) are also available. Refer to page 959 for details.

* Mounting nut and rod end nut are included in the basic weight.

Calculation: (Example) **CVJ3L10-45T**

- Basic weight 93 (g) (ø10-45 stroke)
- Mounting bracket weight 7 (g) (Axial foot type)
- 93 + 7 = 100 g

Manual Operation

Manual operation is possible by pushing the manual button indicated with the arrow.

Specific Product Precautions

Be sure to read this before handling the products. Refer to back page 50 for Safety Instructions, pages 3 to 12 for Actuator and Auto Switch Precautions, and 3/4/5 Port Solenoid Valve Precautions in Best Pneumatics No. 1-1.

Handling Precautions

Caution

1. During installation, secure the rod cover and tighten the mounting nut or the rod cover body by applying an appropriate tightening force.

If the head cover is secured or the head cover is tightened, the cover may rotate, leading to the deviation.

2. Tighten the mounting screws with an appropriate tightening torque within the range given below.

ø6: 2.1 to 2.5 N·m, ø10: 5.9 to 6.4 N·m
ø16: 10.8 to 11.8 N·m

3. Do not operate the single acting cylinder in such a way that a load would be applied when retracting the piston rod of the spring return type or extending the piston rod of the spring extend type.

The spring that is built into the cylinder provides only enough force to retract the piston rod. If a load is applied, the piston rod will not be able to retract to the stroke end.

4. For the single acting cylinder, a breather hole is provided in the cover surface. Do not block this hole during installation.

This may cause malfunction.

5. To remove and install the retaining ring for the knuckle pin or the clevis pin, use an appropriate pair of pliers (tool for installing a type C retaining ring).

In particular, use a pair of ultra-mini pliers for removing and installing the retaining rings on the ø10 cylinder.

6. For the auto switch mounting rail, do not remove the pre-equipped rail.

Since the mounting thread is drilled through inside the cylinder, it may cause air leakage.

Warning

1. Confirm the specifications.

Products in this catalog are designed to be used for compressed air systems. If not operated within the designated pressure or temperature, it may damage the products or cause malfunction. (Refer to specifications.)

2. Energizing continuously for a long period of time

When the valve is continuously energized for a long period of time, the performance may deteriorate, shorten the service life or effect peripheral equipment adversely since temperature rises when coils generate heat.

 Note 5) When "n" is an odd number, an even number that is one larger than this odd number is used for the calculation.
 However, the minimum even number is 4. So, 4 is used for the calculation when "n" is 1 to 3.

Note 1) Auto switch mounting (The adjustment as shown in the figures below is required with the following stroke ranges.)

D-M9□ D-M9□W	15 to less than 20 stroke	45 to less than 55 stroke

Note 2) For the CDVJ3 series, note that 65 strokes cannot be manufactured.
 Note 3) The dimension stated in () shows the minimum stroke for the auto switch mounting when the auto switch does not project from the end surface of the cylinder body and hinder the lead wire bending space. (Refer to the figure below.)
 These contents apply to the rail mounting with one or two auto switches.

 (2) BJ□-1 is a set of "c" and "d".
 BJ4-1 (Switch bracket: White)
 BJ5-1 (Switch bracket: Transparent)

Note 1) Set part number which includes the auto switch mounting band (BJ2-□□□) and the holder kit (BJ5-1/Switch bracket: Transparent). Since the switch bracket (made from nylon) are affected in an environment where alcohol, chloroform, methylamines, hydrochloric acid or sulfuric acid is splashed over, so it cannot be used. Please consult SMC regarding other chemicals.

Note 2) Set part number which includes the auto switch mounting band (BJ2-□□□S) and the holder kit (BJ4-1/Switch bracket: White).

Note 3) For the D-M9□A (V) type auto switch, do not install the switch bracket on the indicator light.

Note 4) Only auto switches are assembled when cylinders are shipped.

Note 5) When a compact auto switch is mounted on the rail mounting type, the auto switch mounting brackets on the left are required. Order them separately from cylinders.

Example order: CDJ2B10-60-A 1 unit
 D-M9BWV 2 pcs.
 BQ2-012 2 pcs.

Besides the models listed in How to Order, the following auto switches are applicable. Refer to pages 941 to 1067 for detailed specifications.

Auto switch type	Part no.	Electrical entry (Fetching direction)	Features
Reed	D-C73, C76	Grommet (In-let)	—
	D-C80		Without indicator light
Solid state	D-H7A1, H7A2, H7B		—
	D-H7NW, H7PW, H7BW		Diagnostic indication (2-color)

* For solid state auto switches, auto switches with a pre-wired connector are also available. Refer to pages 1014 and 1015 for details.

* Normally closed (NC = b contact) solid state auto switches (D-F9G/F9H types) are also available. Refer to page 959 for details.

Mounting		Basic type, Axial foot type, Rod side flange type, Head side flange type, Single clevis type, Double clevis type, Head side trunnion type, Rod side trunnion type			

Note) The figures marked with "*" represent the values of the cylinder with the silencer type exhaust throttle valve removed. To operate the cylinder at these values, prevent dust from entering by installing an AN120-M5 silencer on the EXH port.

Solenoid Valve Specifications

Applicable solenoid valve model		VZ3□90 series	
Coil rated voltage		Standard: 100/200 VAC (50/60 Hz), 24 VDC Semi-standard: 110/220 VAC, 12 VDC	
Effective area of valve (Cv factor)		4.5mm ² (0.25)	
Allowable voltage		-15 to 10%	
Coil insulation		Class B or equivalent (130°C)	
Electrical entry		Grommet, L plug connector, M plug connector, DIN terminal	
Power consumption (W) ^(Note)	DC	1.8 (With indicator light: 2.1)	
Apparent power (VA) ^(Note)	AC	Inrush	4.5/50 Hz, 4.2/60 Hz

25		
32		
40		

Note 1) Other intermediate strokes can be manufactured upon receipt of order. When exceeding 300 stroke, the allowable maximum stroke length is determined by the stroke selection table.

Note 2) Applicable strokes should be confirmed according to the usage. For details, refer to the CM2 series of the "Air Cylinders Model Selection" on front matter pages of the Best Pneumatics No. 2-1. In addition, the products that exceed the standard stroke might not be able to fulfill the specifications due to the deflection etc.

Rod Boot Material

⚠️ Precautions

Be sure to read this before handling the products. Refer to back page 50 for Safety Instructions, pages 3 to 12 for Actuator and Auto Switch Precautions, and 3/4/5 Port Solenoid Valve Precautions in Best Pneumatics No. 1-1.

Mounting

⚠️ Warning

1. Do not rotate the cover.

If a cover is rotated when installing a cylinder or screwing a fitting into the port, it is likely to damage the junction part with cover.

⚠️ Caution

1. Not able to disassemble.

Cover and cylinder tube are connected to each other by caulking method, thus making it impossible to disassemble. Therefore, internal parts of a cylinder other than rod seal are not replaceable.

2. Use caution to the popping of a retaining ring.

When replacing rod seals and removing and mounting a retaining ring, use a proper tool (retaining ring plier: tool for installing type C retaining ring). Even if a proper tool is used, it is likely to inflict damage to a human body or peripheral equipment, as a retaining ring may be flown out of the tip of a plier. Be much careful with the popping of a retaining ring. Besides, be certain that a retaining ring is placed firmly into the groove of rod cover before supplying air at the time of installment.

3. Do not touch the cylinder during operation.

Use caution when handling a cylinder, which is running at a high speed and a high frequency, because the surface of a cylinder tube could get so hot enough as to cause you get burns.

4. Do not use an air cylinder as an air-hydro cylinder.

If it uses turbine oil in place of fluids for cylinder, it may result in oil leakage.

5. Conjoin the rod end part, so that rod boot might not be twisted.

If a rod boot is installed with being twisted when installing a cylinder, it will cause a rod boot to fail during operation.

Model Selection

⚠️ Warning

1. Confirm the specifications.

Products in this catalog are designed to be used for compressed air systems. If not operated within the designated pressure or temperature, it may damage the products or cause malfunction. (Refer to specifications.)

2. Energizing continuously for a long period of time

When the valve is continuously energized for a long period of time, the performance may deteriorate, shorten the service life or affect peripheral equipment adversely since temperature rises when coils generate heat.

Opening Range of Throttle Valve and Driving Speed

Measuring conditions: Operating pressure 0.5 MPa
Mounting: horizontal Load: no load on the return side
The speeds indicated above are for reference.

Manual Operation

Manual operation is possible by pushing the manual button indicated with the arrow.

Piston Speed Adjustment

- To slow down the piston speed, screw in the needle of the silencer type exhaust throttle valve clockwise, which reduces the amount of air that is discharged.
- To adjust the piston extension side, regulate the "R1" side silencer type exhaust throttle valve.
To adjust the retraction side, regulate the "R2" side silencer exhaust throttle valve.
- The needle valve of the throttle valve can be fully opened by loosening it 8 turns from the fully closed position.
- The needle valve has a loosening prevention construction.

Changing between Rod Extended when Energized and Rod Retracted when Energized

Step [This procedure is for changing the rod extended when energized to the rod retracted when energized.]

1. Using a tool, loosen the two hexagon socket bolts, and remove the plate and the solenoid valve. At this time, instead of removing the plate and the solenoid valve separately, remove them together, with the hexagon socket bolts remaining inserted.

2. A sub-plate gasket is inside the sub-plate. Invert this sub-plate gasket 180° and install it with its letter "B" visible. (A portion that protrudes is provided on the periphery of the sub-plate gasket, and the letter "B" is on one side of this protrusion.)

3. Install the solenoid valve and the plate, and tighten the hexagon socket bolts with a tool. The tightening torque is between 0.6 and 0.8 N·m.

After tightening, press the manual button on the solenoid valve, check for any air leaks, and verify the operating conditions. Distinction between rod extended when energized and rod retracted when energized can be determined from the outside, by looking through the small window in the sub-plate.

CVM5K Series

A hexagon shaped rod that does not rotate.

Non-rotating accuracy

$\varnothing 20, \varnothing 25 - \pm 0.7^\circ$

$\varnothing 32, \varnothing 40 - \pm 0.5^\circ$

Can operate without lubrication.

Auto switches can also be mounted.

Can be installed with auto switches to facilitate the detection of the cylinder's stroke position.

Note 4) Retaining rings (cotter pins for ø40) are included in clevis pins.

Note 5) Pin and retaining ring are not included in pivot bracket.

Note 6) Retaining rings are included in pivot bracket pin.

Accessory (Option)

Refer to page 786 for part numbers and dimensions of the single knuckle joint, double knuckle joint, clevis pin, knuckle pin, rod end nut, mounting nut, and trunnion nut.

⚠ Precautions

Be sure to read this before handling the products. Refer to back page 50 for Safety Instructions, pages 3 to 12 for Actuator and Auto Switch Precautions, and 3/4/5 Port Solenoid Valve Precautions in Best Pneumatics No. 1-1.

Precautions

⚠ Warning

1. Do not rotate the cover.

If a cover is rotated when installing a cylinder or screwing a fitting into the port, it is likely to damage the junction part with cover.

⚠ Caution

1. Avoid using the air cylinder in such a way that rotational torque would be applied to the piston rod.

If rotational torque is applied, the non-rotating guide will deform, causing a loss of non-rotating accuracy. Also, to screw a bracket or a nut onto the threaded portion at the end of the piston rod, make sure to retract the piston rod entirely, and place a wrench on the parallel sections of the rod that protrudes. To tighten, take precautions to prevent the tightening torque from being applied to the non-rotating guide.

Allowable rotational torque (N·m or less)	ø20	ø25	ø32	ø40
	0.2	0.25	0.25	0.44

Disassembly/Replacement

⚠ Caution

1. When replacing rod seals, please contact SMC.

Air leakage may be happened, depending on the position in which a rod seal is fitted. Thus, please contact SMC when replacing them.

2. Not able to disassemble.

Since the cover and the cylinder tube are combined by crimping method, it is impossible to disassemble it. Therefore, the internal parts of a cylinder other than rod seal cannot be replaced at all.

3. Do not touch the cylinder during operation.

If the cylinder is operating at a high frequency, be aware that the cylinder tube surface could become very hot, creating the risk of burns.

4. Conjoin the rod end part, so that rod boot might not be twisted.

If a cylinder were installed with its rod boot being twisted, the rod boot could be damaged during operation.

Model Selection

⚠ Warning

1. Confirm the specifications.

Products in this catalog are designed to be used for compressed air systems. If not operated within the designated pressure or temperature, it may damage the products or cause malfunction. (Refer to specifications.)

2. Energizing continuously for a long period of time

When the valve is continuously energized for a long period of time, the performance may deteriorate, shorten the service life or affect peripheral equipment adversely since temperature rises when coils generate heat.

Note 1) Set part number which includes the auto switch mounting band (BM2-□□□A) and the holder kit (BJ5-1/Switch bracket: Transparent).

Since the switch bracket (made from nylon) are affected in an environment where alcohol, chloroform, methylamines, hydrochloric acid or sulfuric acid is splashed over, so it cannot be used. Please consult SMC regarding other chemicals.

Note 2) Set part number which includes the auto switch mounting band (BM2-□□□AS/tailess steel screw) and the holder kit (BJ4-1/Switch bracket: White).

Note 3) For the D-M9□A (V) type auto switch, do not install the switch bracket on the indicator light.

[Mounting screw set made of stainless steel]

The following set of mounting screws made of stainless steel is available. Use it in accordance with the operating environment. (Please order the auto switch mounting bracket separately, since it is not included.)

BBA4: For D-C7/C8/H7 types

Note 2) Refer to page 1048 for the details of BBA4.

- (1) BJ□-1 is a set of "a" and "b".
 - (2) BM2-□□□A (S) is a set of "c" and "d".
- Band (c) is mounted so that the projected part is on the internal side (contact side with the tube)
- BJ4-1 (Switch bracket: White)
BJ5-1 (Switch bracket: Transparent)

Besides the models listed in How to Order, the following auto switches are applicable. Refer to pages 941 to 1067 for detailed specifications.

Accessory Bracket

Further information on accessories are the same specifications as these of the standard double acting single rod. Refer to page 786.

Manual Operation

Manual operation is possible by pushing the manual button indicated with the arrow.

⚠️ Precautions

Be sure to read this before handling the products. Refer to back page 50 for Safety Instructions, pages 3 to 12 for Actuator and Auto Switch Precautions, and 3/4/5 Port Solenoid Valve Precautions in Best Pneumatics No. 1-1.

Operating Precautions

⚠️ Warning

1. Do not rotate the cover.

If a cover is rotated when installing a cylinder or screwing a fitting into port, it is likely to damage the junction part with cover.

⚠️ Caution

1. Not able to disassemble.

Cover and cylinder tube are connected to each other by caulking method, thus making it impossible to disassemble. Therefore, internal parts of a cylinder other than rod seal are not replaceable.

2. Use caution to the popping of a retaining ring.

When replacing rod seals and removing and mounting a retaining ring, use a proper tool (retaining ring plier: tool for installing type C retaining ring). Even if a proper tool is used, it is likely to inflict damage to a human body or peripheral equipment, as a retaining ring may be flown out of the tip of a plier. Be much careful with the popping of a retaining ring. Besides, be certain that a retaining ring is placed firmly into the groove of rod cover before supplying air at the time of installment.

⚠️ Caution

3. Do not touch the cylinder during operation.

Use caution when handling a cylinder, which is running at a high speed and a high frequency, because the surface of a cylinder tube could get so hot enough as to cause you get burned.

4. One-touch fitting cannot be replaced.

One-touch fitting is press-fit into the cover, thus cannot be replaced.

Model Selection

⚠️ Warning

1. Confirm the specifications.

Products in this catalog are designed to be used for compressed air systems (including vacuum). If not operated within the designated pressure or temperature, it may damage the products or cause malfunction. (Refer to specifications.)

2. Energizing continuously for a long period of time

When the valve is continuously energized for a long period of time, the performance may deteriorate, shorten the service life or affect peripheral equipment adversely since temperature rises when coils generate heat.

Built-in One-touch Fitting

CVM3 F —
 ↓ Built-in One-touch fitting

One-touch fittings are installed on cylinders.

For dimensions of each mounting bracket, refer to pages 796 to 802.

* Solid state auto switches marked with "○" are produced upon receipt of order.
 * D-A9□/M9□V□/M9□W□/M9□A□(V) types cannot be mounted.
 *1 Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance. Consult with SMC regarding water resistant types with the above model numbers.
 *2 1 m type lead wire is only applicable to D-A93.

* Since there are other applicable auto switches than listed, refer to page 811 for details.
 * For details about auto switches with pre-wired connector, refer to pages 1014 and 1015.
 * D-A9□/M9□/M9□W auto switches are shipped together (not assembled). (Only auto switch mounting brackets are assembled before shipped.)

CVM3K Series

A hexagon shaped rod that does not rotate.

Non-rotating accuracy

∅20, ∅25 — ±0.7°

∅32, ∅40 — ±0.5°

Can operate without lubrication.

Auto switches can also be mounted.

Can be installed with auto switches to facilitate the detection of the cylinder's stroke position.

⚠ Precautions

Be sure to read this before handling the products. Refer to back page 50 for Safety Instructions, pages 3 to 12 for Actuator and Auto Switch Precautions, and 3/4/5 Port Solenoid Valve Precautions in Best Pneumatics No. 1-1.

Operating Precautions

⚠ Caution

1. Avoid using the air cylinder in such a way that rotational torque would be applied to the piston rod.

If rotational torque is applied, the non-rotating guide will deform, causing a loss of non-rotating accuracy. Also, to screw a bracket or a nut onto the threaded portion at the end of the piston rod, make sure to retract the piston rod entirely, and place a wrench on the parallel sections of the rod that protrudes. To tighten, take precautions to prevent the tightening torque from being applied to the non-rotating guide.

Allowable rotational torque (N·m or less)	ø20	ø25	ø32	ø40
	0.2	0.25	0.25	0.44

Disassembly/Replacement

⚠ Caution

1. When replacing rod seals, please contact SMC.

Air leakage may be happened, depending on the position in which a rod seal is fitted. Thus, please contact SMC when replacing them.

Model Selection

⚠ Warning

1. Confirm the specifications.

Products in this catalog are designed to be used for compressed air systems. If not operated within the designated pressure or temperature, it may damage the products or cause malfunction. (Refer to specifications.)

2. Energizing continuously for a long period of time

When the valve is continuously energized for a long period of time, the performance may deteriorate or affect peripheral equipment adversely since temperature rises when coils generate heat.

Since the switch bracket (made from nylon) are affected in an environment where alcohol, chloroform, methylamines, hydrochloric acid or sulfuric acid is splashed over, so it cannot be used. Please consult SMC regarding other chemicals.
Note 2) Set part number which includes the auto switch mounting band (BM2-□□□AS/tainless steel screw) and the holder kit (BJ4-1/Switch bracket: White).
Note 3) For the D-M9□A (V) type auto switch, do not install the switch bracket on the indicator light.

- (1) BJ□-1 is a set of "a" and "b".
- (2) BM2-□□□A (S) is a set of "c" and "d".
Band (c) is mounted so that the projected part is on the internal side (contact side with the tube).

* D-A91/M9C/M9L/M9W/M9A auto switches are shipped together (not assembled). (Only auto switch mounting brackets are assembled before shipped.)

* Solid state auto switches marked with "○" are produced upon receipt of order.

** D-G5C/W/K59W/G59F cannot be mounted on $\varnothing 40$ and $\varnothing 50$ lube type cylinder.

*** D-B5C/B64/G5K5 types are mountable only upon a receipt of order. (Not mountable after the time of shipment)

**** D-A9C cannot be mounted on $\varnothing 50$. Select auto switches in brackets.

- **Operation type can be changed to rod extended when energized or rod retracted when energized.**
- **Ease of maintenance and inspection.**
The solenoid valve can be separated easily and the cylinder can also be disassembled.
- **A manual operation mechanism is provided as standard equipment (non-locking).**

Specific Product Precautions

Be sure to read this before handling the products. Refer to back page 50 for Safety Instructions, pages 3 to 12 for Actuator and Auto Switch Precautions, and 3/4/5 Port Solenoid Valve Precautions in Best Pneumatics No. 1-1.

Precautions

Warning

1. Do not loosen the cushion valve more than 2 turns from the fully closed state.
Do not loosen it more than 2 turns because this could cause the cushion valve to be ejected.

Caution

1. Do not use an air cylinder as an air-hydro cylinder, because this could result in oil leakage.
2. Do not turn the piston rod with the rod boot kept locked.
When turning the piston rod, loosen the band once and do not twist the rod boot.
3. Set the breathing hole in the rod boot downward or in the direction that prevents entry of dust or water content.

4. Use a socket wrench when replacing mounting brackets.
The use of other tools could cause parts such as nuts to become deformed or affect their ease of service. For the sockets to be used, refer to the table below.

Bore size (mm)	Nut	Width across flats	Socket
40, 50	DA00180 (M8 x 1.25, Hexagon nut 3 types)	13	JIS B 4636 + 2 point angle socket 13
63	DA00009 (M10 x 1.25, Hexagon nut 3 types)	17	JIS B 4636 + 2 point angle socket 17
80, 100	DA00013 (M12 x 1.75, Hexagon nut 3 types)	19	JIS B 4636 + 2 point angle socket 19

5. Do not replace the bushings or the cushion seals.
The bushings and the cushion seals are press-fitted. To replace them, they must be replaced together as a cover assembly.
6. To replace a seal, apply grease to the new seal before installing it.
If the cylinder is put into operation without applying grease to the seal, it could cause the seal to wear significantly, leading to premature air leakage.
7. Do not disassemble a trunnion type cylinder.
It is extremely difficult to align the axial center of the trunnion with the axial center of the cylinder. Thus, if this type of cylinder is disassembled and reassembled, there is the likelihood that the required dimensional accuracy cannot be attained, which could lead to a malfunction.
8. Operate the cylinder at a drive speed within the range of 50 and 500 mm/s.
(Operate within the range of absorbed energy. Refer to the front matters (Air cylinder model selection) of Best Pneumatics No. 2-1.)

Selection

Warning

1. Confirm the specifications.
Products in this catalog are designed to be used for compressed air systems. If not operated within the designated pressure or temperature, it may damage the products or cause malfunction. (Refer to specifications.)
2. Energizing continuously for a long period of time
When the valve is continuously energized for a long period of time, the performance may deteriorate or effect peripheral equipment adversely since temperature rises when coils generate heat.

Piston Speed Adjustment

1. To slow down the piston speed, screw in the needle of the silencer exhaust throttle valve clockwise, to reduce the amount of air that is discharged.
2. The throttle valve needle opens fully when it is loosened 11 turns from its fully closed position.

3. After the specified speed has been set, secure the needle with the lock nut.

Manual Operation

Manual operation (non-locking) is possible by pushing the manual button about 3 mm.

* Seal kit includes 21, 22, 24, 25, 27, 28. Order the seal kit, based on each bore size. (The parts indicated with numbers 23 and 26 are not replaceable.)

* Seal kit includes a grease pack (ø40, ø50: 10 g, ø63, ø80: 20 g, ø100: 30 g). Order with the following part number when only the grease pack is needed.

Grease pack part no.: GR-S-010 (10 g), GR-S-020 (20 g)

Valve Mounted Cylinder: Non-rotating Rod Type

Double Acting

CV3K Series

Non-lube Type: $\varnothing 40, \varnothing 50, \varnothing 63$

How to Order

Built-in Magnet Cylinder Model

If a built-in magnet cylinder without an auto switch is required, there is no need to enter the symbol for the auto switch.
(Example) CDV3KL40-100-1

		Suffix for cylinder	
Rod boot	J	Nylon tarpaulin	
	K	Heat resistant tarpaulin	
Cushion	N	Without cushion	
	R	With cushion on rod end	
	H	With cushion on head end	
	Nil	With cushion on both ends	

* When specifying symbol more than one, combine symbols alphabetically.

Solenoid valve	
Nil	2 position single
W	2 position double

Made to Order
Refer to page 823 for details.

Solenoid valve voltage	
1	100 VAC (50/60 Hz)
2	200 VAC (50/60 Hz)
5	24 VDC

For other rated voltages, please consult with SMC.

Cylinder stroke (mm)
Refer to page 823 for standard strokes.

Non-rotating rod type

Mounting type	
B	Basic type
L	Axial foot type
F	Rod side flange type
C*	Single clevis type
D*	Double clevis type
T	Center trunnion type

* Except tubing I.D. $\varnothing 40$

Bore size	
40	40 mm
50	50 mm
63	63 mm

Number of auto switches

Nil	2 pcs.
3	3 pcs.
S	1 pc.
n	"n" pcs.

Electrical entry

Nil	Grommet
D	DIN terminal

Rod extended/
retracted when energized

Nil	Rod extended when energized
B	Rod retracted when energized

* Symbol "B" is not required for double solenoid.

* Since there are other applicable auto switches than listed, refer to page 831 for details.

* For details about auto switches with pre-wired connector, refer to pages 1014 and 1015.

* D-A9□/M9□/M9□/WM9□/A auto switches are shipped together (not assembled). (Only auto switch mounting brackets are assembled before shipped.)

* Solid state auto switches marked with "○" are produced upon receipt of order.

*** D-B5□/B64/G5/K5□ types are mountable only upon a receipt of order. (Not mountable after the time of shipment)

**** D-A9□ cannot be mounted on $\varnothing 50$. Select auto switches in brackets.

Valve Mounted Cylinder: Non-rotating Rod Type Double Acting **CV3K Series**

Adjustable speed.

Built-in throttle valves are provided to enable speed adjustments in each direction.

Operation type can be changed to rod extended when energized or rod retracted when energized.

A manual operation mechanism is provided as standard equipment (non-locking).

An auto switch cylinder with the switch installed can also be manufactured.

Symbol	Specifications
-XA□	Change of rod end shape
-XC7	Tie-rod, cushion valve, and tie-rod nut made of stainless steel
-XC15	Change of tie-rod length

Refer to pages 826 to 831 for cylinders with auto switches.

- Proper auto switch mounting position (detection at stroke end) and mounting height
- Minimum auto switch mounting stroke
- Operating range
- Auto switch mounting bracket: Part no.

Specifications

Applicable bore size (mm)	40	50	63
Action	Double acting		
Fluid	Air		
Proof pressure	1.35 MPa		
Maximum operating pressure	0.9 MPa		
Minimum operating pressure	0.15 MPa		
Ambient and fluid temperature	-10 to 50°C (No freezing)		
Cushion	Air cushion		
Stroke length tolerance	Up to 250 st ⁺¹⁰ °, 251 to 600 st ⁺¹⁴ °		
Port size	Rc 1/4		
Lubrication	Not required (Non-lube)		
Piston speed	50 to 500 mm/s *		
Rod non-rotating accuracy	±0.8°		
Allowable rotational torque	0.44 N·m or less		
Mouting	Basic type, Axial foot type, Rod side flange type, Single clevis type, Double clevis type, Center trunnion type		
Allowable kinetic energy	2.4 J	4.4 J	7.8 J

* Operate within the range of absorbed energy.

Solenoid Valve Specifications

Applicable solenoid valve model	V3□08			
Coil rated voltage	100/200 VAC (50/60 Hz), 24 VDC			
Effective area of valve (Cv factor)	18 mm ² (1.0)			
Electrical entry	Grommet, DIN terminal			
Allowable voltage	-15 to 10% of the rated voltage			
Coil insulation	Class B or equivalent (130°C)			
Apparent power ^{Note)}	AC	Inrush	50 Hz	8.5 VA
			60 Hz	7.5 VA
		Holding	50 Hz	7.0 VA
			60 Hz	5.5 VA
Power consumption ^{Note)}	DC	6 W		

Note) At the rated voltage.

Note) The cylinders with the standard strokes indicated above can be delivered in a short term. Intermediate stroke except mentioned above is manufactured upon receipt of order.
 • When the auto switch is attached, the minimum stroke is going to be different. Refer to pages 828 and 829.
 The minimum stroke length is different in the trunnion type. Refer to pages 828 and 829 for further information.

Please consult with SMC for longer strokes than the strokes marked with *.

Opening Range of Throttle Valve and Driving Speed

Conditions: Operating pressure 0.5 MPa, Horizontal mounting, No load, Spring return side
 • The speeds shown in the graph are for reference.

Rod Boot Material

Handling

1. Adjusting of the piston speed
2. Change of voltage specifications
3. Manual operation
4. Changing between rod extended when energized and rod retracted when energized.

Since the operations above 1. to 4. are the same as the CV3 Series, refer to page 816.

⚠ Precautions

- Be sure to read this before handling the products.
- Refer to back page 50 for Safety Instructions and pages 722 to 724 for Common Precautions.

Operating Precautions

⚠ Caution

1. Avoid using the air cylinder in such a way that rotational torque would be applied to the piston rod.

If rotational torque is applied, the non-rotating guide will become deformed, causing a loss of non-rotating accuracy. Also, to screw a bracket or a nut onto the threaded portion at the end of the piston rod, make sure the retract the piston rod entirely, and place a wrench on the parallel sections of the rod that protrudes. To tighten, take precautions to prevent the tightening torque from being applied to the non-rotating guide.

Disassembly/Replacement

⚠ Caution

1. When replacing rod seals, please contact SMC.
Air leakage may be happened, depending on the position in which a rod seal is fitted. Thus, please contact SMC when replacing them.

Selection

⚠ Warning

1. Confirm the specifications.
Products in this catalog are designed to be used for compressed air systems. If not operated within the designated pressure or temperature, it may damage the products or cause malfunction. (Refer to specifications.)
2. Energizing continuously for a long period of time
When the valve is continuously energized for a long period of time, the performance may deteriorate or effect peripheral equipment adversely since temperature rises when coils generate heat.

*1 Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance.

Consult with SMC regarding water resistant types with the above model numbers.

*2 1 m type lead wire is only applicable to D-A93.

* Lead wire length symbols: 0.5 m Nil (Example) M9NW
 1 m M (Example) M9NWM
 3 m L (Example) M9NWL
 5 m Z (Example) M9NVZ

* Solid state auto switches marked with "○" are produced upon receipt of order.

** D-B5□/G5□/K5□ types are mountable only upon a receipt of order. (Not mountable after the time of shipment)

*** D-A9□ cannot be mounted on ø50. Select auto switches in brackets.

* Since there are other applicable auto switches than listed, refer to page 849 for details.

* For details about auto switches with pre-wired connector, refer to pages 1014 and 1015.

* D-A9□/M9□/W9□/A auto switches are shipped together (not assembled). (Only auto switch mounting brackets are assembled before shipped.)

Speed controller installed

Operation type can be changed to rod extended when energized or rod retracted when energized.

A selection of solenoid valves is possible.

Single, double and 3 position solenoid valves are mountable.

An auto switch cylinder with the switch installed can also be manufactured.

* Order two foot brackets per cylinder.

** Accessories for each mounting bracket are as follows.

Foot, Flange, Single clevis: Body mounting bolts, Spring washer

Double clevis: Body mounting bolts, Spring washer, Clevis pin, Flat washer, Cotter pin.

Opening Range of Throttle Valve and Piston Speed

Conditions: Operating pressure 0.5 MPa,
Horizontal mounting, No load, Extending stroke
• The speed shown above are for reference.

Piston Speed Adjustment Procedure

- To slow down the piston speed, screw in the speed controller needle clockwise, which reduces the amount of air that is discharged.
- The speed controller needle opens fully when it is loosened 3 1/2 turns from its fully closed position. After the specified speed has been set, secure the needle with the lock nut.

Changing between Rod Extended when Energized and Rod Retracted when Energized

- This is possible by reversing the SUP port and EXH port piping.

- This is possible by inverting the solenoid valve direction 180°.

Manual Operation

Using a screwdriver or its equivalent, push the center of the rubber plug on the head of the solenoid cap of the solenoid valve.

(It is not necessary to remove the rubber plug.)

Specific Product Precautions

Be sure to read this before handling the products. Refer to back page 50 for Safety Instructions and pages 3 to 12 for Actuator and Auto Switch Precautions.

Selection

⚠ Warning

1. Confirm the specifications.

Products in this catalog are designed to be used for compressed air systems. If not operated within the designated pressure or temperature, it may damage the products or cause malfunction. (Refer to specifications.)

2. Energizing continuously for a long period of time

When the valve is continuously energized for a long period of time, the performance may deteriorate or effect peripheral equipment adversely since temperature rises when coils generate heat.

3. Mounting orientation

Metal seal: For single solenoids, mounting orientation is flexible. For double solenoids and 3 position valves, mount a spool valve horizontally.

Handling

⚠ Warning

1. Do not open the cushion valve beyond the stopper.

A retaining ring is installed as a cushion valve retention mechanism. Do not open the cushion valve beyond it. If not operated in accordance with the above precautions, the cushion valve may be ejected from the cover when air pressure is supplied.

Bore size (mm)	Width across flats	Socket wrench
40, 50	2.5	JIS 4648 Hexagonal wrench key 2.5
63, 80, 100	4	JIS 4648 Hexagonal wrench key 4

2. Use the air cushion at the end of cylinder stroke.

Otherwise, the tie-rod or piston rod assembly will be damaged.

Handling

⚠ Caution

1. Do not use a pneumatic type as an air-hydro cylinder. It can cause oil leak.

2. Do not rotate the piston rod when the rod boot is fixed.

Before rotating the piston rod, loosen the band to avoid twisting the rod boot.

3. Install the rod boot with the breathing hole facing downwards or in a direction suitable to prevent dust, moisture etc. from entering easily into the rod boot.

Disassembly/Replacement

⚠ Caution

1. Use a socket wrench when the bracket is replaced.

If other tools are used, the nut or other parts may be deformed or the work efficiency may decrease. For applicable sockets, refer to the table below.

Bore size (mm)	Nut	Width across flats	Socket	Tightening torque (N·m)
40, 50	DA00040	13	JIS B4636	7.4
	(M8 x 1.25, Hexagon nut 3 types)		+ Two-angle socket 13	
63	DA00010	17	JIS B4636	20
	(M10 x 1.25, Hexagon nut 3 types)		+ Two-angle socket 17	
80, 100	DA00131	19	JIS B4636	29
	(M12 x 1.75, Hexagon nut 3 types)		+ Two-angle socket 19	

2. Do not replace the bushing.

As the bushing is press-fit, replace the cover assembly when the bushing must be replaced.

3. When a seal is replaced, apply grease to the new seal before it is assembled.

Operation of the cylinder without greasing will result in extreme abrasion of the seal, causing premature air leakage.

4. The trunnion type cylinder requires accuracy in assembly.

The trunnion type cylinder may lose dimensional accuracy and malfunction when it is disassembled and reassembled because the axial center of the trunnion and that of the cylinder will not be aligned easily.

*1 Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance.

Consult with SMC regarding water resistant types with the above model numbers.

*2 1 m type lead wire is only applicable to D-A93.

* Lead wire length symbols: 0.5 m.....NII (Example) M9NW
1 m.....M (Example) M9NWM
3 m.....L (Example) M9NWL
5 m.....Z (Example) M9NWZ

* Since there are other applicable auto switches than listed, refer to page 849 for details.

* For details about auto switches with pre-wired connector, refer to pages 1014 and 1015.

* D-A93□/M9□□/M9□□/W/M9□□/A auto switches are shipped together (not assembled). (Only auto switch mounting brackets are assembled before shipped.)

* Solid state auto switches marked with "○" are produced upon receipt of order.

** D-A9□□ cannot be mounted on e50. Select auto switches in brackets.

*** D-85□/G□□/K□□ types are mountable only upon a receipt of order.

(Not mountable after the time of shipment)

Speed controller installed

Operation type can be changed to rod extended when energized or rod retracted when energized.

A selection of solenoid valves is possible.

Single, double and 3 position solenoid valves are mountable.

⚠ Precautions

Be sure to read this before handling the products. Refer to back page 50 for Safety Instructions and pages 722 to 724 for Common Precautions.

Operating Precautions

⚠ Caution

1. Avoid using the air cylinder in such a way that rotational torque would be applied to the piston rod.
 - If rotational torque is applied, the non-rotating guide will become deformed, causing a loss of non-rotating accuracy. Also, to screw a bracket or a nut onto the threaded portion at the end of the piston rod, make sure the retract the piston rod entirely, and place a wrench on the parallel sections of the rod that protrudes. To tighten, take precautions to prevent the tightening torque from being applied to the non-rotating guide.

Disassembly/Replacement

⚠ Caution

1. When replacing rod seals, please contact SMC.

Air leakage may be happened, depending on the position in which a rod seal is fitted. Thus, please contact SMC when replacing them.
2. Do not replace the non-rotating guide.

Since the non-rotating guide is press fitted, the entire cover assembly needs to be replaced instead of a single part.

Selection

⚠ Warning

1. Confirm the specifications.

Products in this catalog are designed to be used for compressed air systems. If not operated within the designated pressure or temperature, it may damage the products or cause malfunction. (Refer to specifications.)
2. Energizing continuously for a long period of time
 - When the valve is continuously energized for a long period of time, the performance may deteriorate or effect peripheral equipment adversely since temperature rises when coils generate heat.
3. Mounting orientation

Metal seal: For single solenoids, mounting orientation is flexible. For double solenoids and 3 position valves, mount a spool valve horizontally.

* D-A9□ and D-A9□V types cannot be mounted on ø50
 * Since this is a guideline including hysteresis, not meant to be guaranteed. (Assuming approximately ±30% dispersion.)
 There may be the case it will vary substantially depending on an ambient environment.

Note 1) Auto switch brackets are included in the D-A3□C/A44C/G39C/K39C types. Specify the part number as follows depending on the cylinder size when ordering.
 (Example) ø40: D-A3□C-4, ø50: D-A3□C-5, ø63: D-A3□C-6, ø80: D-A3□C-8, ø100: D-A3□C-10

Other than the models listed in "How to Order", the following auto switches are applicable.
For detailed specifications, refer to pages 941 to 1067.

Auto switch type	Model	Electrical entry (Fetching direction)	Features
Reed	D-A93V, A96V	Grommet (Perpendicular)	—
	D-A90V		Without indicator light
	D-A53, A56, B53, Z73, Z76	Grommet (In-line)	—
	D-A67, Z80		Without indicator light
Solid state	D-M9NV, M9PV, M9BV	Grommet (Perpendicular)	—
	D-Y69A, Y69B, Y7PV		Diagnostic indication (2-color indicator)
	D-M9NWV, M9PWV, M9BWW		
	D-Y7NWW, Y7PWW, Y7BWW		Water resistant (2-color indicator)
	D-M9NAV, M9PAV, M9BAV		
	D-Y59A, Y59B, Y7P		—
	D-F59, F5P, J59	Grommet (In-line)	Diagnostic indication (2-color indicator)
	D-Y7NW, Y7PW, Y7BW		
	D-F59W, F5PW, J59W		With timer
	D-F5NT, G5NT		

* With pre-wired connector is also available in solid state auto switches. For details, refer to pages 1014 and 1015.

* Normally closed (NC = b contact), solid state auto switch (D-F9G/F9H/Y7G/Y7H type) are also available. For details, refer to pages 959 and 961.
